Thanks again Patrick for checking in with OAQPS and ND. I let Brian, Mike, and Andrea know about the Petition and so looping them in with my reply so they too know the State's plans. Mike will be assigning an OGC attorney for this Petition, so stay tuned. As you may remember, Andrea helped with the source determination analysis and no doubt will continue to.

The State still hasn't issued any response to comments, including our EPA comment letter. They have not issued a final permit. The petitioners had to submit their petition within 60 days of the end of our 45 day review, and therefore did not get a chance to rebut any responses from ND. My understanding after talking

with Matt Spangler and ND is that ND will be resubmitting the proposed permit for another 45 day review with their response to comments

The link in Dylan's email below works better than the one from the law firm that Monica shared.

Subject: Petition on the North Dakota Coyote Station

Hi Gail,

I hope you are doing well after the shutdown.

We received a petition on the Coyote Station in North Dakota on January 15th. The Petition is attached and the attachments can be found [here](#). Looks like a common control issue that Matt will be assigned to.

Thanks,

Dylan Mataway-Novak
